

PAGE MAP · PROPOSAL

A new proposal, rebuilt from the Decisions Log and your reference images, because the Phase 1 Blueprint page map was not available to us for this revision. Nothing here is approved.

Working target: 288 pages, 18 signatures of 16. **Structured content:** 260 pages, plus 10 flexible pages used to start each continent on a right-hand page and each closing spread on a left-hand page. **18 pages are unallocated** and must be reconciled with the Blueprint, which reached 272 before the new sections were added.

Sample pages in this map: Egypt p. 29, Japan p. 92, Italy p. 151, United States p. 206, Australia p. 214, Brazil p. 238. One country per page; continents in alphabetical order, countries alphabetical within each continent (UN M49 regions; the Americas split into North and South America).

OPEN POINTS

1. Unallocated pages: options are (a) restore content from the Blueprint, (b) lined notes pages, or (c) reduce to 272 pages / 17 signatures if the 18 pages cannot be justified. Extent also moves the spine and the price.
2. Color register: our density test shows four pages hold all 195 entries only at 8.5 pt with a strict length budget per entry; at 9 pt it needs six pages. If the register grows, it takes pages from the unallocated pool.
3. Continent assignment of transcontinental countries (Russia in Europe; Türkiye, Cyprus, Georgia, Armenia, Azerbaijan, Kazakhstan in Asia) follows UN M49 and should be confirmed.
4. Country short names follow UN usage (Türkiye, Czechia, Côte d'Ivoire, Cabo Verde, Eswatini, Timor-Leste) with common American English for a few (United States, United Kingdom, Russia, Iran, Vietnam, Laos, Syria, South Korea, North Korea, Tanzania, Bolivia, Venezuela, Moldova, Micronesia, Palestine). The Holy See page needs one consistent naming rule (title "Holy See", with Vatican City State for the territory and its figures).
